Threats for European Roller in Ukraine

- Degradation of breeding habitats
- Using the chemicals on the fields
- Illegal excluding from nature
- Raptor attacks
- Death on the wintering spots

Solutions

1. Continuous research to find out the certain distribution. Annual monitoring
2. Making the artificial nest-boxes
3. Eco-educational work with local population
4. Inventory of current national legislation to identify the gaps
5. Monitoring of illegal activities
6. Making the net of caretakers
